

Do any of the following sound familiar to you or a family member?

Creative, bright and imaginative, but struggle with:

- ✓ Reading difficulties & poor spelling
- ✓ Difficulty with written tasks
- ✓ Poor short-term memory and concentration
- ✓ Low self esteem
- ✓ Frustration
- ✓ Poor co-ordination, organisation and balance

The DORE Programme treats the root cause of learning difficulties like Dyslexia, ADD, ADHD, or Dyspraxia, rather than just the symptoms

- Drug-free
- 93% Success rate
- Over 25,000 success stories worldwide
- Individually prescribed exercises to stimulate brain development
- Suitable for children over 7 years and adults

Wynford Dore, founder of the pioneering DORE Programme for drug-free treatment of learning difficulties, will visit Johannesburg on Monday 21 May and Pretoria on 22 May to present *free* talks to parents and children living with learning difficulties like Dyslexia, Dyspraxia, ADD, ADHD, and Asperger's Syndrome.

You are invited to attend these talks to find out more about the DORE Programme and how it was developed by Wynford Dore in his quest to help his eldest daughter, who attempted suicide due to the effects of her severe dyslexia.

Come and hear how the drug-free DORE programme can help you, or a loved one, reach your full potential.
